

William Stanton Andrews Memorial Town Hall

TOWN OF CLINTON

54 East Main Street
Clinton, Connecticut 06413

Peter Neff
Public Works Director

The Town produces an annual report on the Town's efforts to comply with the conditions of the MS4 General Permit to the maximum extent practical.

MS4 is a conveyance or system of conveyances that is:

- owned by a state, city, town, village, or other public entity that discharges to waters of the U.S.,
- designed or used to collect or convey stormwater (e.g., storm drains, pipes, ditches),
- not a combined sewer, and
- not part of a sewage treatment plant, or publicly owned treatment works (POTW).

In order to prevent harmful pollutants from being washed or dumped into MS4s, certain operators are required to obtain NPDES permits and develop stormwater management programs (SWMPs). The SWMP describes the stormwater control practices that are consistent with permit requirements to minimize the discharge of pollutants from the sewer system.

This general permit requires each municipality to take steps to keep the stormwater entering its storm sewer systems clean before that stormwater enters water bodies. One important element of this permit is the requirement that towns implement public education programs to make residents aware that stormwater pollutants emanate from many of their everyday living activities, and to inform them of steps they can take to reduce pollutants in stormwater runoff.

National Map of Regulated MS4s
